

## **About Naiad**

Naiad Irrigation Systems Ltd. has been servicing Calgary and the surrounding area for 11 years. Over these 11 years, we have expanded drastically from a one man operation to nearly 30 employees during the average summer.

Naiad started as an irrigation service company. Our clients were our neighbors, friends and family. Eventually word got out about our company and the business began to expand, however we are focussed on maintaining the "mom and pop" business feeling, and to this day our clients are still treated as if they are our neighbors, friends, and family.

## **Positions Available**

Naiad is currently hiring for field positions. A brief description of each position is as follows:

### **Irrigation Service Technician – Wage starting at \$19.40 based on experience and work ethic**

Irrigation service technicians are the foundation of our company, it is where we truly started. The day to day operations of a service technician can include but not be limited to:

- Turning on irrigation systems in the spring, inspecting each and every aspect of the system to ensure that it is in proper working order and identifying any potential repairs that need to be made.
- Service technicians also interact with customers on a daily basis, whether it is making recommendations to their irrigation system or answering client questions.
- Repairing commercial and residential irrigation systems as needed

If you enjoy a challenge and/or troubleshooting, or if the idea of every day being something fresh and new, this position may be a great fit for you.

### **Irrigation Installer – Wage starting at \$18.40 based on experience and work ethic**

Although we started out as a service company, eventually the demand from clients requesting a "Naiad" irrigation system grew. Naiad is proud to install premium, high efficiency irrigation systems. The day to day activities of an irrigation installer can include but not be limited to:

- Reading and interpreting irrigation design schematics (almost all of our irrigation systems are designed in house)
- Working with a team of employees to complete the installation
- Using a combination of shovels, augers, and vibratory plows to install the piping and heads of an irrigation system.
- Once the system is in the ground, it is then flushed and nozzles are installed. Nozzles are then adjusted to ensure that the heads are watering the specified target areas.
- Teaching the client how to operate their new irrigation system

Naiad Irrigation Systems Ltd.  
Bay #21, 235105 Wrangler Drive  
Rocky View (Calgary), Alberta

Web: [www.naiadirrigation.ca](http://www.naiadirrigation.ca)

If you're the type of person who is not afraid of physical labour, being outdoors for the vast majority of the day, and get a sense of accomplishment knowing that at the end of the day, you built something with your bare hands, this may be the position for you.

**Lawn Maintenance Worker – Wage starting at \$17.40 based on experience and work ethic**

Naiad Irrigation Systems also has a general lawn maintenance division that services Calgary and the surrounding area. The day to day operations of a lawn maintenance worker include but are not limited to:

- Performing "Spring Cleanup" services on various residential properties. Spring Cleanup services include power raking, core aeration, mowing, trimming, weeding and debris removal
- Weekly and bi-weekly mowing of various residential properties
- Weed removal / shrub bed maintenance.
- Lawn Maintenance is performed by a team of two

If you pride yourself on your attention to detail, and love to work outdoors, and are a team player, lawn maintenance may be a great fit for you.

**What Naiad Can Offer You**

There can be many benefits to working with us, some of note would be:

Cross Training and Job Diversity - We want all of our employees to know the inner workings of an irrigation system so that you can work in all of our positions.

Customer Service Experience – You are our main line of contact with our clients. Gain valuable customer service experience by answering their questions, informing them of potential issues with their systems, and instructing them on the proper use of their irrigation system.

Competitive Wages

If you are interested in joining the Naiad Team, or have questions in general, please do not hesitate to contact us at [info@naiadirrigation.ca](mailto:info@naiadirrigation.ca) or at (403) 618-3767.
